Collection of fire wood from roadsides

There are a number of very healthy and beautiful road side reserves around the Shire of significant ecological and heritage importance. These linear reserves often contain plant and animal communities which are not locally protected in national parks. In some heavily cleared areas of the Shire, the road sides contain the only remaining patches of vegetation native to that landscape. Some of the plants are so rare in the surrounding landscape they are considered threatened or endangered. For these reasons, the removal of standing or fallen timber from the road side is prohibited under the Local Government Act 1993, s 629. To protect remaining road side vegetation, Council requests that residents do not engage in this activity.

Are you thinking of building, extending or subdividing?

If so, please contact Council on 6778 6300 to arrange an appointment to speak to a staff member from Technical Services. Staff from Technical Services are usually available between 9am and 11am Monday to Thursday and are not always able to respond to counter enquiries outside of these hours except by appointment.

Wind and Solar Energy Mapping Tool: Now available until May

If you are a Uralla Shire resident, farmer or community group thinking about installing a small scale (less than 10 MW) energy generation system for non commercial purposes, you can now get access to an online mapping tool that will generate an estimate of the solar and wind resources for individual sites.

To obtain accurate data you need a map reading in latitude and longitude format for the location you propose to place the generation system. These readings can be taken from Ordinance Survey maps, some mobile phones and from the website SixLite:

<http://lite.maps.nsw.gov.au>

For full details, please call an Environmental Projects Officer on 6778 6300. Access to the data has been extended until May 2012.
