

## Public Notification

# Bridge Street Water Main Works – Commencing Soon

Trazlbat will begin water main works in the downtown area starting next week as part of planned infrastructure upgrades.

## Stage 1 – Exploratory Investigations

Commencing next week, Trazlbat will carry out exploratory investigations to locate existing underground utilities. This phase is expected to take approximately **1 week**.

*Please note: There will be **no water outages** during this stage.*

## Stage 2 – Water Main Replacement Works

After Stage 1, Trazlbat will begin **replacement of water mains** along Bridge Street, Uralla. The works will take place within the parking lanes in the following locations:

1. **Eastern side** – from **Salisbury Street to Hill Street**
2. **Eastern side** – from **Hill Street to across from the Brewery**
3. **Western side** – from **Hill Street to the Brewery**

## Work Zone affected by these works

## Schedule and work times

Works are estimated to start from next week with standard hours of operation:

- from 7:00am to 5:00pm Monday to Friday
- from 7:00am to 3:00pm on Saturday.
- No works on Sunday and Public Holiday

## What to expect

- **Parking will be affected** in the working area. However, we will try to minimize the working area at each time, limiting it just to parking spaces between or near two garden islands. Each working area (highlighted below in different colours) should require no more than 2-3 days of work, after which it will be re-opened to the public as usual.

- **Limited footpath impacts** may occur, with pedestrian access maintained wherever possible
- **Access to and from Hill Street** may be restricted during intersection works (2-3days) with detours in place
- The contractor will work closely with Council to **minimise disruption to business access, driveway access, and outdoor seating**. However, **some temporary impacts are anticipated** and appreciated in advance

Water outages **will not occur** during the initial investigation works and construction works. However, **isolated water main shutdowns** will be required at the final connections to the existing water mains.

Affected properties will be notified in advance of any planned outages.

We thank you for your understanding and cooperation as we carry out these essential infrastructure improvements.

For further updates, please stay tuned to upcoming notifications.
